Home / dajaxice / Args Example

Args example

In this example we will send some text to the server and and display it in an alert box.

Add some text…   Send!

Simple example

Simple args example

ajax.py

```python
from django.utils import simplejson
from dajaxice.decorators import dajaxice_register

@dajaxice_register
def args_example(request, text):
    return simplejson.dumps({'message':'Your message is %s!' % text})
```

html

```html
<input type="text" id="text"/>
<input type="button" onclick="Dajaxice.examples.args_example(callback, {'text':$('#text').val()})" value="Send!"/>
```

javascript

```javascript
function callback(data){
    alert(data.message);
}
```
