Simple example

Simple args example

Simple dajaxice example

This is the basic example. We'll ask for a message from the server and show it the browser.

Get message from server!

ajax.py

```python
from django.utils import simplejson
from dajaxice.decorators import dajaxice_register

@dajaxice_register
def dajaxice_example(request):
    return simplejson.dumps({'message':'Hello from Python!'})
```

html

```html
<input type="button" onclick="Dajaxice.examples.dajaxice_example(my_callback)" value="Get messag
e from server!">
```

javascript

```javascript
function my_callback(data){
    alert(data.message);
}
```
